TREQSO

Maintain vehicle specifications and inventory to have access in real time

Typical Applications

TREQSO Vehicle Module is a simple and effective tool for maintaining your vehicle and chassis inventory. Minimize costly mistakes with seamless Sales Order tracking through vehicle and chassis specifications and attributes.

Functions

• Vehicle Maintenance
• Sales Order Processing
• Reporting
• Quoting

Benefits

Tracking vehicle requirements in today's fast paced world can get complicated and ordering parts that don't fit your vehicle will increase costs and waste valuable time.

TREQSO's Vehicle module allows your business to maintain up-to-date vehicle specifications and attributes on the newest vehicles and chassis without labor intensive data-entry.

TREQSO Sales Order tracking helps monitor and manage your vehicle-related sales orders with vehicle VIN from the day a vehicle chassis arrives at the facility to the day your customer takes possession. You can even trach vehicles still at the vehicle manufacturer if you maintain a vehicle pool for the manufacturer.

Robust, customizable reporting keeps all vehicle information at your fingertips.

Features

VEHICLE MAINTENANCE

Add, delete, modify, establish specifications, and verify vehicle certification labels for completed vehicles. TREQSO provides the flexibility to upload vehicles from a file or add them individually.

Save time with easy to use vehicle specification uploads from the vehicle manufacturer.

Search and find a specific vehicle or chassis based on individual or multiple specifications, characteristics, or attributes.

SALES ORDER TRACKING

Add a vehicle or chassis to your sales order with the VIN and TREQSO will track the vehicle or chassis specifications for each order.

With the vehicle or chassis specifications and attributes, you'll ensure the right parts are ordered for your vehicle with specification tracking by make/model/year.

REPORTING

Design, create, and run your own vehicle reports which are saved for future use.

An unlimited number of vehicle reports can be designed to match your needs. You can save the report formats you use on a regular basis.

Interfaces

• Vehicle Maintenance
• Sales Order
• Quoting
